```
 ----jGRASP exec: java -Xnoagent -Djava.compiler=NONE -Xdebug
-Xrunjdwp:transport=dt_socket,suspend=y,server=y PrintMultipOfNDigits
 ----jGRASP: connected to debugger.
```

This program willl take two number that you give it and multiply them together.
Along with that it will show you all of the numbers that you add together to get the
answer.

Enter the first interger: 123
Enter the seond interger: 246

```
        123
    X   246
------------
        738
       4920
      24600
------------
      30258
```

Do you want to run this program again? no

```
 ----jGRASP: operation complete.
```
